- Redaction of functional specifications
- Study to choose a technical framework
- Development using the Symfony framework

Portfolio

My Responsive Resume

Techno: Middleman, Compass, Prawn (PDF generation), Haml

A global capitalization of my work on this little resume. I made it easily reusable, open-source and documented.

I should add a PDF generation, a photo and some personal data soon.

Versions des Faits

Techno: Ruby On Rails, CanCan, CSS3, Travis CI

A community-driven information and analysis website about TV and Internet documentaries. Checks the facts, reveals the opinions and presents critical or alternative points of view. French only for now.

The work is still in progress, but the site is almost ready for its first release.

File Input Drop Zone

Techno: jQuery, Coffeescript, HTML5

A simple jQuery plugin that adds drag'n'drop support to a page area linked to a file input.

Stacking XP

Techno: Wordpress

My developer blog.

Just a messy stack really, where I throw some development stuff I didn't find anywhere else and had to figure out by myself, so they might save someone's time in the same situation.

Skills

Web development

HTML5, CSS3, Javascript, jQuery, JSON, Coffeescript, SASS, Compass, XML, XSL, XPath, Typo3, Wordpress, Responsiveness

Ruby

Ruby On Rails, FactoryGirl, UnitTest, RSpec, Haml, Middleman, Prawn, CanCan
